Education

Illinois Institute of Technology , Chicago, IL	Aug 2024 – May 2026
Master of Science in Computer Science	GPA: 3.4/4.00
University of Mumbai , Mumbai, India	Jun 2020 – May 2023
Bachelor of Engineering in Computer Engineering	GPA: 3.8/4.00

Professional Experience

Full Stack Development Intern | PARI Technologies (M) SDN BHD., Remote Oct 2025 – Dec 2025
Tech Stack: Python, Git, ReactJS, FastAPI, TypeScript, Selenium, BeautifulSoup, WebDriver, Pandas

- Worked on a full-stack AI learning platform using React and FastAPI, contributing to UI development and backend API design.
- Designed an AI-powered chatbot using Google Gemini and a RAG pipeline to improve accuracy and contextual responses.
- Automated complex data extraction workflows by developing Python scripts using Selenium, WebDriver, and BeautifulSoup.
- Extracted and processed large-scale data with 20,000+ columns from websites, enhancing data accuracy and operational efficiency.

Build Student Consultant | The Build Fellowship by Open Avenues Jul 2025 – Sep 2025
Tech Stack: Python, Prometheus, PromQL, Grafana, Alertmanager, YAML, Git

- Built an end-to-end synthetic monitoring platform to track server uptime, latency, and packet loss across multiple services.
- Implemented a Python exporter to collect network metrics and expose them in Prometheus format for time-series monitoring.
- Enabled Prometheus metric scraping and alert evaluation to proactively detect downtime and performance degradation.
- Crafted Grafana dashboards and alerting workflows using Prometheus rules and Alertmanager, enabling real-time visibility.

Software Developer | Crayon Infotech Pvt Ltd., India Aug 2023 – Jul 2024
Tech Stack: PHP, CodeIgniter, Laravel, MVC, Python, Git, SQL/NOSQL, PostgreSQL, RESTful API, Flask API

- Delivered full-stack PHP services in Laravel and CodeIgniter for client-facing applications, prioritizing reliability and production.
- Collaborated closely with cross-functional teams to deliver stable, high-quality releases across multiple production applications.
- Optimized SQL queries to improve performance and support efficient data retrieval across large-scale database systems.
- Created REST APIs that helped connect internal systems with external vendor platforms, supporting reliable data exchange.
- Maintained and enhanced Python-Flask-PostgreSQL backends, increasing query performance by 25% while supporting growth.

Software Developer Intern | Lab Systems Pvt. Ltd., India Jul 2022 – May 2023
Tech Stack: Python, Blockchain Architecture, Blockchain Nodes, Hashing

- Programmed efficient Python scripts and simplified OSINT workflows to analyze transactions and support forensic investigations.
- Managed over 20 TB of blockchain data using indexing and engineering techniques to support high-throughput analytics.
- Provisioned and maintained 3+ distributed cryptocurrency nodes, enabling secure on-premises investigations in stealth mode.

Relevant Academic Projects

Time-Series Forecasting | Tech: TensorFlow/Keras, Facebook Prophet, StatsModels, Flask, React, Docker, GCP

- Built a data pipeline to ingest GitHub metrics from 2 years of activity, enabling time-series forecasting and trend analysis.
- Engineered robust Flask microservices for model training and predictions, integrated with a React dashboard using Docker.
- Deployed scalable cloud services on Google Cloud Run with CI/CD pipelines, improving scalability and reliability by 40%.

Skills and Certifications

Programming Languages: Python, C++/C, JavaScript, TypeScript, SQL, NoSQL, PHP, HTML, CSS, SASS
Frameworks & Libraries: Pandas, Web3, ReactJS/NextJS, ExpressJS, CodeIgniter, Laravel, Flask, Django, TailwindCSS
Development Tools: AWS, Docker, GCP, MongoDB, Postman, Git/GitHub, Slack, ElasticSearch, Figma, Rest APIs, Unit Testing, CI/CD, JIRA, Vercel, Firebase, Azure

Relevant Skills: Competitive Programming, Data Structures & Algorithms, OOP, Blockchain Architecture, ETL Processes, Data Mining, Data Analytics, Operating Systems, Agile Methodologies, Software Project Management, API Integration, Software Engineering, Product Design, User Interface and Experience Design, Client Relations and Management

Patent

D Ein Blockchain-basiertes Medizinlogistiksystem (Granted) Date: 19 September 2023
German Patent File No - 20 2023 102 823.3 - Developed a secure and scalable blockchain-based web application for efficiently tracking prescription drugs worldwide, significantly improving traceability by 85% and reducing counterfeit incidents.
