Summary

Full-Stack Software Engineer experienced in building scalable web applications, backend systems, and AI-powered platforms using Python and modern JavaScript frameworks. Skilled in cloud deployments, automation workflows, and API development, with a focus on clean architecture, performance, and reliable production systems.

Education

Illinois Institute of Technology, Chicago, IL	Aug 2024 – May 2026
Master of Computer Science	GPA: 3.5/4.00
University of Mumbai, Mumbai, India	Jun 2020 – May 2023
Bachelor of Engineering in Computer Engineering	GPA: 3.8/4.00

Professional Experience

Backend Developer Community Dreams Foundation (Elpsan Bio) <i>Tech Stack: Python, Node.js, PostgreSQL, REST APIs, NLP, GCP</i>	<i>Aug 2026 – Present</i>
--	---------------------------

- Developed backend services for Elpsan Bio, an AI-driven biotech startup automating therapeutic discovery and drug repurposing.
- Built REST APIs and data workflows for symptom ingestion, phenotype mapping, and biomedical platform integration.
- Designed PostgreSQL data models for research data, phenotype mappings, confidence scoring, versioning, and evidence tracking.
- Collaborated with engineering, machine learning, and research teams to build and launch the startup’s initial MVP platform.

Full Stack Development Intern PARI Technologies (M) SDN BHD., Remote <i>Tech Stack: Python, Git, React, FastAPI, TypeScript, Selenium, BeautifulSoup, WebDriver, Pandas</i>	<i>Oct 2025 – Dec 2025</i>
---	----------------------------

- Worked on a full-stack AI learning platform using React and FastAPI, contributing to UI development and backend API design.
- Designed an AI-powered chatbot using Google Gemini and a RAG pipeline to improve accuracy and contextual responses.
- Automated complex data extraction workflows by developing Python scripts using Selenium, WebDriver, and BeautifulSoup.
- Extracted and processed large-scale data with 20,000+ columns from websites, enhancing data accuracy and operational efficiency.

Build Student Consultant The Build Fellowship by Open Avenues <i>Tech Stack: Python, Prometheus, PromQL, Grafana, Alertmanager, YAML, Git</i>	<i>Jul 2025 – Sep 2025</i>
---	----------------------------

- Built an end-to-end synthetic monitoring platform to track server uptime, latency, and packet loss across multiple services.
- Implemented a Python exporter to collect network metrics and expose them in Prometheus format for time-series monitoring.
- Enabled Prometheus metric scraping and alert evaluation to proactively detect downtime and performance degradation.
- Crafted Grafana dashboards and alerting workflows using Prometheus rules and Alertmanager, enabling real-time visibility.

Software Developer Crayon Infotech Pvt Ltd., India <i>Tech Stack: PHP, CodeIgniter, Laravel, MVC, Python, Git, SQL/NoSQL, PostgreSQL, REST APIs, Flask</i>	<i>Aug 2023 – Jul 2024</i>
--	----------------------------

- Delivered full-stack PHP services in Laravel and CodeIgniter for client-facing applications, improving reliability and readiness.
- Collaborated closely with cross-functional teams to deliver stable, high-quality releases across multiple production applications.
- Optimized SQL queries to improve performance and support efficient data retrieval across large-scale database systems.
- Created REST APIs that helped connect internal systems with external vendor platforms, supporting reliable data exchange.
- Maintained and enhanced Python-Flask-PostgreSQL backends, increasing query performance by 25% while supporting growth.

Relevant Academic Projects

SignalFlow (Real-Time Kanban) Tech Stack: C#, .NET 8, SignalR, SQLite, Next.js, TypeScript, CSS, Docker
• Implemented a real-time SignalR WebSocket hub to synchronize drag-and-drop task updates across connected browser clients. • Built an ASP.NET Core API and SQLite database using Entity Framework Core, securing endpoints with CORS policies. • Developed a Next.js and TypeScript dashboard using custom CSS, containerizing the multi-service stack with Docker Compose.

Skills and Certifications

Programming Languages: Python, Java, Bash, C++/C, C#, JavaScript, TypeScript, PHP
Frontend Technologies: HTML, CSS, SASS, Tailwind CSS, React, Next.js, Angular, Figma, Web3
Backend Technologies: .NET, Express.js, FastAPI, Flask, Laravel, CodeIgniter, REST APIs, LLMs, RAG, LangGraph
Databases: SQL, NoSQL, MongoDB, DynamoDB, Neo4j, ChromaDB, Elasticsearch, Firebase
Development Tools: AWS, Docker, Kubernetes, GCP, Azure, Postman, Git/GitHub, CI/CD, Unit Testing, Vercel, JIRA, Slack
Certifications: AI Agents in LangGraph, AI Agentic Design Patterns with AutoGen, AWS Academy Cloud Foundations
